

# CB&Q BURLINGTON M-4 COLORADO

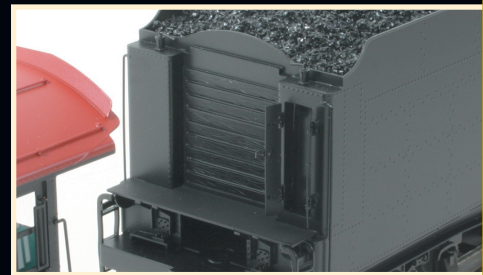

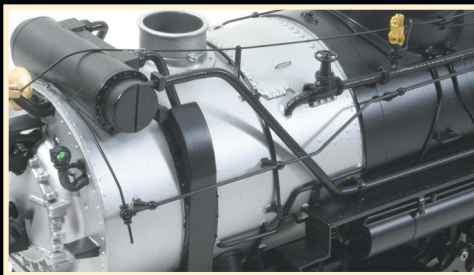

Production Sample: Elesco

Production Sample

Production Sample

The BIGGEST and HEAVIEST locomotive on the CB&Q, the "Colorado" Class will come in either Worthington, or Elesco Feedwater Heater Versions.

B&LE had 47 of these 2-10-4s and transferred 17 of them to the DM&IR, where they ran until 1961.

A unique and rare piece, the Sunset M-4a is a limited production in O Scale 2R (56" Radius Min.) or 3R (072, TMCC, EOB, RS). Only a few of each version remain.

Also available are B&LE and DM&IR (Grey Boiler) 2-10-4s.

Each has the detailing of the prototype. CB&Q models have working Mars Light, all have very detailed cab interior with crew figures, working vents, hatches, cab apron etc.

**Models Arriving in July 2008**
