

# CANADIAN PACIFIC D-10 4-6-0

**AWESOME  
DETAIL**

Late Version Sample

Early Version

**T**here were over 500 such 4-6-0 'Whyte' type locomotives owned by Canadian Pacific over the years. It was the most populous wheel configuration on the railway. Ten-wheelers were sturdy little engines capable of working passenger and freight trains in mainline and branchline duties. They were also often used as helpers when heavy freights needed "double-heading" over certain grades. Because of their flexibility D10s were used all over the CP system and many lasted until the end of steam operations in 1960.

Sunset Models is proud to present, this all-brass, fine scale model of the CPR D-10 in both an Early and Late versions.

Utilizing our steel ball-bearing "Quiet Drive" mechanism, this magnificent Steam engine will grace your layout or display with the distinctive details of the Canadian Pacific Railroad. 48" Radius 2 Rail Track or 054 3 Rail Track Compatible.

3 Rail models come with Electric Railroad Cruise, TMCC, Legacy, DCS and Conventional Control Compatible. 2/4 Synchronized Puffing Smoke and Lionel Railsounds 4.0. 2 Rail Models are wired for DC and come with directional Lighting.
